Malan", Alzheimer Disease Assessment Centre (U.V.A.), Multiple Sclerosis Centre, Paediatric Cardiology Centre, Hip surgery Centre, Electrophysiology and Arrhythmology, Hand and Lower Limb Microsurgery Centre, Multidisciplinary Centre for Prevention, Diagnosis and Treatment of Gastrointestinal Neoplasms, Centre for Diagnosis and Treatment of Heart Valvular Disease, Centre of Obesity Treatment and Hypoitary Disease Investigation, Centre of Oesophageal Diseases.

IRCCS Istituto
Ortopedico Galeazzi

Excellence in healthcare, education, and scientific research, awards IRCCS Policlinico San Donato as one of the most important Hospitals for Heart Surgery in Italy. IRCCS Policlinico San Donato is connected to the major hospitals in Italy and all over the world.

Excellence in Care

IRCCS Policlinico San Donato provides the highest number of heart surgical interventions in Italy, about 2.000 per annum. In 2006 out of 14.312 inpatients, 11.048 were in the cardiovascular divisions. It is the most important hospital for treatment and Care of Congenital heart disease in Italy. IRCCS Policlinico San Donato is the reference hospital for the emergency care in cardiovascular disease in Milan, out of 4.000 patients in the Emergency Room, about 40% needed cardiovascular care (year 2006).

Excellence in Education

IRCCS Policlinico San Donato is one of the University of Milan headquarters for Medicine and Surgery degree; about 20 Medical Doctors working in our hospital are university teachers, over 240 students are trained every year. In IRCCS Policlinico San Donato reside 15 Schools of Specialization that host about 70 specializing graduates every year. Every year the hospital hosts about 20 resident Medical Doctors from abroad.

Excellence in Scientific Research

Since 1998 about 400 scientific works have been published, 78 of them have been published in 2006 (214,8 Impact Factor points) in the cardiovascular area alone.

* IRCCS means "Istituto di Ricovero e Cura a Carattere Scientifico", Scientific Institutes for Research, Hospitalization and Health Care. IRCCS are independent institutions of national relevance working according to standards of excellence in order to perceive research aims, mainly clinical and translational, in the bio-medical field as well as in the organization and management of sanitary services, with special reference to highly specialized hospitalization and health care
